HASIBE ERDOGAN

Bristol, UK | +44 7467 810123 | hsb.erdgn12@gmail.com | linkedin.com/in/hasibe-erdogan | github.com/h2-erdogan

PROFESSIONAL SUMMARY

Computer Science graduate (2:1) focused on graduate and junior software engineering, backend, and cloud roles. Hands-on experience building REST APIs with Python, FastAPI, Django, and PostgreSQL, alongside deploying containerised applications using Docker, Kubernetes, Azure, and Terraform. Skilled in CI/CD workflows, infrastructure automation, and monitoring using GitHub Actions and Grafana.

TECHNICAL SKILLS

Programming	Python, SQL, JavaScript, TypeScript
Backend & APIs	FastAPI, Django, Flask, REST APIs, SQLAlchemy, Pydantic
Cloud & DevOps	Microsoft Azure, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD
Databases & Tools	PostgreSQL, Grafana, Git, Linux, Docker Compose

PROJECT EXPERIENCE

Industrial Cloud Monitoring System (Final Year Project)

FastAPI | PostgreSQL | Docker Compose | Grafana | GitHub Actions | SQLAlchemy

- Engineered a real-time IoT monitoring backend platform using FastAPI, SQLAlchemy, and PostgreSQL to ingest and process high-frequency sensor telemetry data.
- Implemented a Rolling Z-Score statistical anomaly detection engine to classify data severity (OK/WARN/ALERT) and built custom Grafana dashboards for real-time visibility.
- Containerised multi-service architecture using Docker Compose, integrating database health checks, health probes, and continuous integration (CI) via GitHub Actions.

Bristol Food Network Web Application

Django | Python | PostgreSQL | Docker | REST APIs

- Developed a full-stack web application for local food distribution management using Django and PostgreSQL.
- Containerised the environment using Docker to streamline cross-environment deployment consistency.
- Designed clean RESTful API endpoints and database models for efficient data persistence.

Kubernetes CI/CD Deployment Platform

Kubernetes | Docker | GitHub Actions | FastAPI

- Containerised a FastAPI application and deployed it to Kubernetes with health probes and resource limits.
- Automated build and deployment validation using GitHub Actions CI/CD workflows.

Terraform Azure Infrastructure

Terraform | Microsoft Azure | GitHub Actions

- Designed reusable Terraform modules to provision Azure networking, storage, and security groups (IaC).
- Integrated Terraform validation with GitHub Actions to automate cloud infrastructure checks.

EDUCATION

BSc (Hons) Computer Science - Upper Second-Class Honours (2:1) 2023 – 2026

University of the West of England, Bristol | Bristol, UK

Relevant Coursework: Distributed & Enterprise Software Development, Advanced Databases, Advanced Algorithms, Operating Systems, Advanced Software Development.

CERTIFICATIONS

- **Data Science Essentials with Python** & **Introduction to Cybersecurity** – Cisco Networking Academy (2026)
